ERP FOR STEEL FABRICATION & PEB MANUFACTURING

From quotation to completion.

Connect quotations, materials, production, inspection and dispatch in one workspace.

FabMastery / Quality dashboard

Which quality issues need attention?

Review an open non-conformance and the issue that needs follow-up.

Open NCR

Formal non-conformance records that are still open and need closure.

NCR No	Date	Source	Severity	Status	Issue
OPS-NCR-001	10-11-2026	Process	MEDIUM	OPEN	Inspect frame alignment

1 2 3

1 Find the record
Follow its NCR reference.

2 Check the status
See what remains open.

3 Read the issue
Understand the next review.

Actual FabMastery interface · Open NCR detail · Sample-data preview

See material movement

Follow receipts, issues and returns to understand stock availability.

Follow production progress

Connect planned work with daily records, WIP and inspection status.

Review the detail

Use connected records and reports to investigate the figures behind a job.

A connected view across every handover.

01 Enquiry & quotation → 02 BOM & materials → 03 Purchase & stores → 04 Production & inspection → 05 Dispatch & reporting

Explore FabMastery with a free 15-day demo.

Choose the modules your team wants to explore and see how the workflows fit your business.

Questions? fabmastery@gmail.com

Dedicated deployment for your business.

After a successful demo and paid onboarding, FabMastery is set up on your own VPS and domain. Server and domain charges are itemised in your proposal.

10 CONNECTED MODULES

Give every team the context it needs.

Explore the workflows your business uses each day, from the first customer enquiry to operational and financial reporting.

CRM & Quotations
Track enquiries, costing, follow-ups and quotation revisions.

Purchase RFQ & PO
Compare supplier offers and manage purchase orders.

Stores & Inventory
Follow material receipts, issues, returns and stock movement.

Production Planning
Review BOMs, cutting plans, daily progress and WIP.

Quality & Inspection
Review inspection results, quality checkpoints and rework.

HR & Payroll
Manage employee records, attendance, leave and payroll.

Accounting, GST & TDS
Explore vouchers, ledgers, financial statements and tax records.

Reports Hub
Filter reports and use available PDF, Excel and CSV outputs.

Asset & Maintenance
Track machines, maintenance plans and breakdown history.

Approvals & Workflows
Follow approval responsibilities and document status.

From demo to your own deployment.

Evaluate FabMastery first. When you decide to join, we agree your module scope and onboarding, then set up your business on its own server and domain.

01 **Request your 15-day demo**
Select the modules you want to explore.

02 **Evaluate the available workflows**
Receive approved access and use sample records.

03 **Join FabMastery**
Agree the scope, charges and onboarding.

04 **Launch on your server & domain**
A separate VPS for your business.
